Lead Software Engineer with four years building backend systems that carry production traffic. Currently lead engineer on Prezent Vivo, an AI-native platform for life sciences communications, where I own the accuracy of template conversion — keeping every converted deck brand-aligned for enterprise customers. Took ownership of production reliability at Prezent and drove the failure rate to effectively zero. ACM ICPC Regionalist (2020, 2021) and LeetCode Knight, which shows up as a habit of fixing the algorithm before adding infrastructure.

EXPERIENCE

Lead Software Engineer — Prezent JAN 2026 – PRESENT
India

- Lead engineer on Prezent Vivo (the Lightning project), an AI-native platform for life sciences communications.
- Own the accuracy of template conversion — started on the feature in prezent.ai and carried it into the Lightning project, keeping converted decks brand-aligned for customers.
- Owned production bug triage and hardening, bringing the failure rate down to almost zero.
- Set technical direction for backend platform work and mentor newer engineers through design review.

Senior Software Engineer — Prezent JAN 2025 – JAN 2026
Chennai, Tamil Nadu

- Built and shipped scalable microservices, design through production.

Software Engineer II — EagleView APR 2024 – JAN 2025
Bengaluru, Karnataka

- Optimised a complicated network algorithm for over **95%** improvement.
- Shipped a demoable ReactJS interface that lifted sales **20%**.
- Built scalable NestJS backend systems with caching, improving application performance **30%**.

Software Engineer I — EagleView JUL 2022 – APR 2024
Bengaluru, Karnataka

- Full stack delivery across ReactJS and NodeJS, with DynamoDB and S3 behind them.

Software Engineer Intern — ValueLabs FEB 2022 – MAY 2022

- REST APIs in Spring Boot, using advanced Java 8 features.

Data Structures Intern — The Entrepreneurship Network SEP 2021 – FEB 2022

- Authored data structures and algorithms material, including two published articles.
